SECTIONS IN THIS FAQ

- 1. Pre-Purchase (3 Questions)
- 2. Returns (3 Questions)

Pre-Purchase

Q1. How do I ensure a phone case is compatible with my phone model?

A: Each case listing specifies compatible phone models. Use the compatibility filter — enter your phone brand and model. Ensure you select the correct variant (e.g., iPhone 15 vs iPhone 15 Pro Max have different case sizes).

Q2. Are the power banks on Drawnzers BIS certified?

A: Yes. All power banks must carry BIS certification (IS 16102). Drawnzers strictly lists only BIS-certified power banks. Check for the ISI mark on the product listing images and the actual product.

Q3. Is there a difference between fast-charging and regular cables?

A: Yes. Fast-charging cables are built for higher current delivery and are compatible with Quick Charge (QC) or Power Delivery (PD) standards. Regular cables may not support fast charging. Compatibility is listed on each cable's product page.

Returns

Q4. I applied the screen protector and it has bubbles. Can I return it?

A: Factory-defect bubbles (present before application) are a valid return reason. Bubbles caused during application are not. Report within 10 days with photos of the bubble pattern for assessment.

Q5. My charger is overheating. What should I do?

A: Stop using the charger immediately — overheating is a safety hazard. Report within 10 days via 'My Orders'. For safety concerns, Drawnzers prioritizes these reports and issues an immediate replacement or refund. Do not use the charger again.

Q6. I broke my phone case while trying to fit it. Is it returnable?

A: Cases broken during installation due to incorrect fitting technique are generally not returnable. However, if the case is of incorrect size (doesn't fit the listed compatible model), it qualifies for return. Report with photos.
