SECTIONS IN THIS FAQ

- 1. Pre-Purchase (3 Questions)
- 2. Delivery & Installation (2 Questions)
- 3. Returns & Warranty (2 Questions)

Pre-Purchase

Q1. What wattage mixer grinder should I buy?

A: For everyday home use: 500–750W. For heavy-duty use (grinding hard spices, large batches): 750W–1000W. Higher wattage provides more power but consumes more electricity. Wattage and power consumption details are listed on each product page.

Q2. Is voltage stabilizer required for kitchen appliances?

A: We recommend using a voltage stabilizer for high-wattage appliances (OTGs, microwave ovens, induction cooktops) in areas with unstable power supply. Voltage fluctuation can damage appliances and may void warranty. Stabilizer recommendations are mentioned in product listings where applicable.

Q3. Are the appliances suitable for Indian voltages?

A: Yes. All kitchen appliances on Drawnzers are rated for 220V-240V, 50Hz (Indian standard). International models are clearly marked if listed.

Delivery & Installation

Q4. Is installation available for kitchen chimneys?

A: Yes. Chimney installation service is available in select cities at ₹499–₹999. Book at checkout or from 'My Orders' post-delivery. The technician will call to schedule the appointment.

Q5. How long does kitchen appliance delivery take?

A: Small appliances (kettles, toasters): 2–5 business days. Large appliances (chimneys, water purifiers): 5–10 business days.

Returns & Warranty

Q6. My new microwave showed error code on first use. What do I do?

A: Report within 48 hours of delivery via 'My Orders' as 'Dead on Arrival'. Drawnzers will arrange a replacement. Provide the specific error code shown and your unboxing video if available.

Q7. My mixer grinder motor stopped working after 1 month. What do I do?

A: This falls under manufacturer warranty (motor typically has 5-year warranty). Contact the brand's service center with your Drawnzers invoice. Drawnzers can facilitate contact with the service center if needed — email kitchen@drawnzers.in.
