Last Updated:	1st January 2025

SECTIONS IN THIS FAQ

1. Pre-Purchase (3 Questions)
2. Returns & Sustainability (2 Questions)
3. Packaging (1 Questions)

Pre-Purchase

Q1. How does Drawnzers verify eco-friendly claims?

A: Drawnzers' sustainability review team verifies all eco-friendly product listings against accepted certifications (GOTS, GRS, FSC, NPOP, OK Biodegradable, etc.). Products without verifiable certifications are not listed in the Eco-Friendly category. The Drawnzers Green Score (1–5 leaves) reflects verified sustainability credentials.

Q2. What is the Drawnzers Green Score?

A: The Drawnzers Green Score (1–5 leaves) rates a product's sustainability across material sourcing, manufacturing impact, packaging, and end-of-life recyclability. 5 leaves = highest sustainability level. Score methodology is transparent and displayed on each product page.

Q3. Are bamboo products truly eco-friendly?

A: Bamboo grows rapidly without pesticides and is biodegradable. However, some bamboo products involve chemical processing (bamboo fabric). Drawnzers lists only bamboo products that meet OEKO-TEX or equivalent certification for safe chemical processing.

Returns & Sustainability

Q4. I want to return an eco-friendly product but I'm worried about the carbon footprint of return logistics.

A: Drawnzers understands this concern. For minor issues with eco-friendly products, we may offer a partial refund without requiring return — reducing reverse logistics carbon footprint. We also offer Drawnzers Reward Points for choosing the partial refund option over physical return.

Q5. A product claimed to be organic but doesn't have any certification on the packaging. What do I do?

A: Report suspected greenwashing immediately to ecofraud@drawnzers.in with the product name, Order ID, and photos. Drawnzers investigates all greenwashing reports seriously. Confirmed cases result in seller delisting and a full refund + 10% compensation to you.

Packaging

Q6. Is Drawnzers' packaging for eco-friendly products itself eco-friendly?

A: Yes. All Eco-Friendly category orders are packed using 100% recycled cardboard, paper tape, biodegradable void fill, and seed paper packing slips. Zero plastic packaging is used for this category.
